

Guidelines to Authors

Scope

The Indian Journal of Chest Diseases & Allied Sciences (IJCDAS) is a biomedical quarterly Journal with international circulation. It considers manuscripts covering clinical and experimental work related with all aspects of chest diseases and allied sciences.

It publishes original articles (with original research), review articles (both narrative and evidence-based), radiology forum, case reports, short/brief research communication, clinical images of interest, book reviews and letter to the editor.

Papers that make a significant contribution to the existing state of knowledge in a particular field be considered for publication.

The IJCDAS discourages duplication of data already published in other journals, with certain changes/addition are made.

The Editorial Policy

All manuscripts submitted to the IJCDAS and considered suitable for processing are subject to peer review process. Authors need to certify in the covering letter that this manuscript has not been submitted to any other journal simultaneously.

All manuscripts are screened initially at the editorial office for suitability for consideration for publication. Those found suitable are sent to 2-3 reviewers, including a statistical expert based on the need. The journal follows the double blind peer review process.

After peer review process, manuscripts considered suitable for publication are suitably edited before publication.

The processes of submission of manuscript, peer review, communication of final decision and sending proofs are done through online system.

TYPE OF MANUSCRIPTS

1. Original Articles

The approximate length of article should preferably be 2500-3500 words (excluding Abstract and References). Original research articles should include a structured abstract (of 250 words maximum) under four subheadings: (i) Background, (ii) Methods, (iii) Results, and (iv) Conclusions, followed by 3-6 key words arranged alphabetically. The main article should include the sections in following order: Introduction, Material and Methods, Results, Discussion, Conclusion(s), Acknowledgment (if any), Conflicts of Interest and References. The permission

from Ethics Committee/ Institutional Review Board (IRB) is mandatory for all studies on human subjects and animals and this should be mentioned in the Material and Methods section. Registration of clinical trials is mandatory and registration number/CTR number should be mentioned. The methods used for statistical analysis of the data should be specified.

2. Reviews

Narrative review articles written by scientist(s)/ expert(s) working in the particular area and who has/have published quality original research, will be considered. The article could be 5000-6000 words (excluding Abstract and References) with not more than 100 references (recent and relevant) and an unstructured abstract of about 250 words. Tables and Figures could be included as per requirement. Copyright permission should be obtained from the copyright holder in advance, if a published Table/Figure is reproduced in part or whole.

3. Systematic Reviews (Including Meta-analysis)

The articles under this section will be critical appraisal of different studies on important topics of clinical/public health significance to obtain an unbiased quantitative estimate of the overall effect of an intervention or variable for a defined outcome. The focus could be on cause, diagnosis, prognosis, therapy, prevention, etc. These would be thoroughly researched articles giving comprehensive and balanced perspective. There should be a structured abstract. Systematic reviews could be about 2500-3000 words with minimum number of Tables/Figures. These will be published subject to peer review.

6. Short/Brief Communication

Original research manuscripts containing well defined study design and sample size but limited parameters analysed may be submitted as Short Papers. These would be about 2000 words and contain an unstructured abstract with a combined Results & Discussion section. A research correspondence would be either a preliminary/pilot study or a post-implicative report with no abstract. Submissions with preliminary investigative data with limited methodology and sample size but having important clinical implications may be submitted as a Short Note containing a 200 words unstructured abstract. Both Correspondence and Short Note would be of around 1000-1500 words containing either a Table and/or a Figure.

7. Radiology Forum

Rare and educative cases may be presented under this section. A maximum of two authors are allowed per

clinical image submission of whom, one should be a faculty associated with the case. A concise write up without reference or running title, of around 125-150 words may be submitted, containing details of the place (department/institute) and period (month/year) of patient presentation, diagnosis, treatment and follow up (along with the duration of follow up). Clear and well resolved images (up to 3-4 or as panels; JPEG/TIFF format with at least 300 dpi resolution) may be submitted with the write up.

SUBMISSION OF MANUSCRIPT

Manuscripts must be submitted online: ijcdas@yahoo.co.in.

The IJCDAS does not charge for submission and processing of the manuscript.

All manuscripts submitted for publication to the IJCDAS should include the following: (1) **First page**; (2) **Article file**; (3) **Tables & Figures**; (4) **A scanned copy of ethical clearance certificate**; (5) **Undertaking by authors**. Details are given below:

1. First Page

This should include a Covering letter, Title page and include: (i) Type of manuscript: original article/ review/ correspondence/ perspective/ clinical image/ letter to editor; (ii) Title; (iii) name(s) of author(s) with highest degree; (iv) name(s) of the Department(s); (v) designations (academic position) of authors in the department; (vi) Short title; (vii) one of the authors should be identified as the corresponding author of the paper, who would be responsible for the contents of the paper as for communication with the Publication office with all above mentioned details; (viii) Number of Tables; (ix) Number of Figures; (x) Source of financial support in the form of grants; (xi) Registration number in case of Clinical Trials.

2. Article File

Manuscripts must be submitted online: ijcdas@yahoo.co.in. processing or publication of articles. Manuscripts should be presented in as concise form as possible, typewritten neatly. Pages should be numbered consecutively and the contents arranged in the following order:

Title

Title of the article should be short, continuous (broken or hyphenated titles are *not* acceptable) and yet sufficiently descriptive and informative so as to be useful in indexing and information retrieval.

Title Page

Title page should include name(s) of author(s) with highest degree, departmental affiliations, designation (position) in the department

Short running title not exceeding 5-6 words must also be provided.

Abstract and Key words:

A set of suitable Key words (3-6 in number) arranged alphabetically should be provided.

All original manuscripts should have a structured abstract (of about 250 words) with subheadings of *Background*, *Methods*, *Results*, and *Conclusions*. Abstract should be brief and indicate the scope and significant results of the paper. It should only highlight the principal findings and conclusions so that it can be used by abstracting services without modification. Conclusions and recommendations not found in the text of the articles should not be included in the Abstract.

Introduction

It should briefly review the current state of knowledge strictly concerning the topic of the paper. No mention should be made of the results obtained or conclusions drawn. Review of the literature should be restricted to reasons for undertaking the present study and provide only the most essential background. The objective of the study should be written clearly with adequate justification.

Material and Methods

The nomenclature, the source of material and equipment used, with the manufacturer's details in parenthesis, should be clearly mentioned. The procedures adopted should be explicitly stated to enable other workers to reproduce the results, if necessary. New methods may be described in sufficient detail indicating their limitations. Established methods can be just mentioned with authentic references and significant deviations, if any given, with reasons for adopting them. While reporting experiments on human subjects and animals, it should be clearly mentioned that procedures followed are in accordance with the ethical standards laid down by the national bodies or organizations of the particular country. The drugs and chemicals used should be precisely identified, including generic name(s), dosage(s) and route(s) of administration.

Study design: Selection of the observational or experimental participants (patients or laboratory animals, including controls, whether randomly or consecutively) and basis of sample size calculation should be mentioned clearly, including eligibility and exclusion criteria and a description of the source population. Period (with month and year) and place of the study should be clearly stated.

Contributors may consult the following Guidelines for specific study designs:

Sr. No.	Type of study	Source
1.	Randomized controlled trials (RCTs)	CONSORT- http://www.consort-statement.org
2.	Systematic reviews & meta-analysis	PRISMA guidelines- http://www.prisma-statement.org
3.	Observational studies in epidemiology	STROBE - http://www.strobe-statement.org/
4.	Meta-analysis of observational studies in epidemiology	MOOSE http://statswrite.eu/pdf/MOOSE%20Statement.pdf
5.	Studies on diagnostic accuracy	STARD - http://www.stard-statement.org

Studies based on clinical trials: All clinical trials should be registered in a Primary Clinical Trial Registry and the Registration number to be given under Material and Methods. Articles presenting with results of randomized clinical trials should provide information on all major study elements, including the protocol, assignment of interventions (methods of randomization, concealment of allocation to treatment groups), and the method of masking (blinding), based on the CONSORT Statement (<http://www.consort-statement.org/>). It should be clearly stated that study protocol was approved by the institutional ethics committee. The statistical analysis done and statistical significance of the findings should be mentioned.

Results

The data should be arranged in unified and coherent sequence so that the report develops clearly and logically. Data presented in Tables and Figures should not be repeated in the text. Only important observations need to be emphasised or summarised. The same data should not be presented both in tabular and graphic forms.

Discussion

The discussion should deal with the interpretation of results without repeating information already presented under Results. It should relate new findings to the known ones and include logical deductions. It should also mention any weaknesses/limitations/lacunae of the study.

The conclusions can be linked with the goals of the study but unqualified statements and conclusions not completely supported by the data should be avoided. All hypotheses should, if warranted, clearly be identified as such; recommendations may be included as part of the Discussion, only when considered absolutely necessary and relevant. This section should preferably end with a concluding remark.

Acknowledgment

Acknowledgment should be brief and made for specific scientific/technical assistance and financial support only and not for providing routine departmental facilities and encouragement or for help in the preparation of the manuscripts (including typing or secretarial assistance).

Financial support and Sponsorship

Acknowledgment should be made for funding support and/or sponsorship received from national or international funding agencies.

Conflicts of Interest

A conflict of interest exists if authors or their institutions have financial or personal relationships with other people or organizations that could inappropriately influence (bias) their actions. A conflict can be actual or potential, and full disclosure to the Editor is absolute requirement. All submissions must include disclosure of all relationships that could be viewed as presenting a potential conflict of interest.

All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. If there are no conflicts of interest, authors should state so.

References

The total number of References should normally be restricted to a maximum of 30 for Original Research Articles.

References should be typed on a separate page after the text and these should be numbered consecutively in the order in which they are first mentioned in the text. Identify references in text, tables, and legends by Arabic numerals in parentheses. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure. The titles of journals should be abbreviated according to the style used in *Index Medicus*. Consult the *List of Journals Indexed in Index Medicus PMC*, published annually as a separate publication by the library and as a list in the January issue of *PUBs*. The list can also be obtained through the library's web site (<http://www.nlm.nih.gov>). Unpublished work should not be cited in references, but may be cited fully parenthetically within the text. List all the authors when there are six or fewer; but when there are seven or more, list the first six, then '*et al*'. Examples of correct form of references are given here:

Correctness of the reference list is the entire responsibility of the author (s).

Figures and Tables

Figures. Photographs are required (10 cm × 8 cm, 300 dpi in JPEG or TIFF); good black and white contrast is essential for good reproduction. All illustrations must be numbered and cited in the text. Legends should be provided for each illustration, listed on a separate page. Within a multi-panel figure, different parts should be labelled as A, B, C,...etc. on top left corner. Symbols, arrows and letters used in the photomicrographs should be legible and in contrast with the background. All lettering must be done professionally. Freehand or typed lettering is not acceptable. **Colour illustrations must be paid by the authors. Please ask rates/charges from the Publication Office of the IJCDAS.**

Tables. Each table should be typed double-spaced on a separate sheet. These should have an underlined title followed by a legend, if any. Explanatory matter should be in a footnote, not in the title. The approximate position of each table in the text should be indicated in the margin of the manuscript.

Page Proofs and Reprints. A galley proof will be sent to the corresponding author online that should be returned within four days. Corrections should be limited to printer's errors only and no substantial additions/deletions should be made. No change in the names of authors (by way of additions and/or deletions) is permissible at the proof stage.

Papers which have been accepted/ published become the property of the Indian Journal of Chest Diseases and Allied Sciences and permission to re-publish them must be obtained from the Editor.

Abbreviations

Only standard abbreviations are to be used. The abbreviations should conform to the International System of Units (SI), throughout the text, Tables and Figures. Generic names of the drugs should be used. If proprietary brands are used in research brand name, name of manufacturer and country should be given in parentheses after the generic name at the first place of use.

ETHICAL CLEARANCE CERTIFICATE

All studies conducted on patients / volunteers/ Human biological material/animals should submit a scanned copy of Ethical Clearance Certificate.

Standard abbreviations to be used in IJCDAS

The abbreviations should be used in the text, tables and illustrations without a full stop.

Online Manuscript Submission Check List

The Indian Journal of Chest Diseases and Allied Sciences [ijcdas.yahoo.co.in]

- Covering letter including copy-right release
- Manuscript of the article on A-4 size paper
- Name and address of author responsible for correspondence about the manuscript, including highest degree and affiliations of each author [not less than Assistant Professor].
- Abstract (up to 250 words) along with 3-6 key words
- Running title (5-6 words)
- All illustrations (10 cm × 8 cm 300 dpi in JPEG), appropriately labelled and each illustration is cited within the text.
- Check all references for accuracy and completeness. Put references in proper format in numerical order, making sure each is cited in the text.
- Scanned copy of Undertaking duly signed by all authors should be submitted as single file (sequence of authors should be maintained as per title page).

UNDERTAKING BY AUTHORS

We, the undersigned, give an undertaking to the following effect with regard to our article entitled

submitted for publication in the *Indian Journal of Chest Diseases and Allied Sciences*:

1. The article mentioned above has not been published or submitted to or accepted for publication in any form, in any other journal;
2. We also vouchsafe that the authorship of this article will not be contested by anyone whose name(s) is/are not listed by use here; and
3. We also agree to the authorship of the article in following sequence:

	Author's Name(s) (in sequence)	Signature of Author(s)
1.	_____	_____
2.	_____	_____
3.	_____	_____
4.	_____	_____
5.	_____	_____
6.	_____	_____
7.	_____	_____
8.	_____	_____

IMPORTANT

1. All the authors are required to sign this form independently in the sequence given above.
2. Each author should have generated at least a part of the intellectual content of the paper.
3. Each author should be able to defend publicly in the scientific community, that intellectual content of the paper for which he/she can take responsibility.
4. No addition/deletion/or any change in the sequence of the authorship will be permissible at a later stage
